

Crash Course: Surgery, 1e

Part of the Crash Course Series, Surgery opens with presenting complaints and differential diagnoses. In Part II, the history and examination is considered and how to write up a medical clerking. This book is disease oriented, covering diagnosis, aetiology and pathogenesis, complications, and treatment. This section links back to the presenting complaints in Part I. MCQs, case studies, and essay questions make up Part IV and enable students to assess their exam performance.
