

Zero to a Thousand: An Educational Guide to Effectively Hunt and Shoot to 1000 Yards

Zero to a Thousand covers the concepts necessary to shoot to one thousand yards. This book includes dialogue regarding preferred cartridges, rifle setup, bullet choices, vertical bullet drop, wind drift, weather conditions, ballistics software and much more. Whether ones goal is to push their hunting distance further or to have fun plinking steel at long ranges, this book will help. Preface excerpt: Shooting has been a passion of mine since the age of two. My father raised me in Central Arkansas on a small farm where we had the opportunity to shoot as much as we could afford. Fortunately, we have the ability to shoot out to 1100 yards and everything in between on our farm. I grew up flipping through the ballistics charts in the Hornady Handbook Vol. II. This reloading manual sparked my interest in long range shooting. For the passed 10 years, I have been educating myself on the necessary concepts in order to execute effective shots out to 1,000 yards. I have been very effective in this quest and wish that I had been able to locate all of the information that taught me what I know today in one, simple location ten years ago. The goal of this book is to take the novice shooter/ hunter from zero to one thousand yards. Building a rifle and load capable of performing at one thousand yards is a large task. Once the rifle and load are tuned, one must be able to make vertical and horizontal adjustments with their scope in order to achieve adequate precision...
