

Boobytraps U.S. Army Instruction Manual Tactics, Techniques, and Skills Plus Contractors on the Battlefield

A great value! Two military manuals combine into one book. If you purchase both books separate you will pay more for the books plus shipping cost. A booby trap is an explosive charge cunningly contrived to be fired by an unsuspecting person who disturbs an apparently harmless object or performs a presumably safe act. A. This manual contains procedures, techniques, and expedients for the instruction of the soldier in the assembly, use, detection, and removal of boobytraps in combat. B. Included are descriptions and discussions of the design and functioning characteristics of standard demolition items; firing devices, explosives, missiles, hand grenades, mortar ammunition, artillery ammunition, and bombs. C. This manual also contains information on a variety of items and indigenous materials useful for improvising firing devices, explosives, and pyrotechnic mixtures for guerrilla warfare applications. D. Factory-produced boobytraps (dirty trick devices) are described. E. Safety measures pertinent to booby trapping operations are provided for the protection of troops from casualty. This manual contains detailed instruction, diagrams and illustrations to ensure excellent understanding of all aspects of boobytraps and improvised explosive devices. Contractors on the Battlefield: Contractors have always accompanied our armed forces. However, the increasingly hi-tech nature of our equipment and rapid deployment requirements have significantly increased the need to properly integrate contractor support into all military operations. Recent reductions in military structure, coupled with high mission requirements and the unlikely prospect of full mobilization, mean that to reach a minimum of required levels of support, deployed military forces will often have to be significantly augmented with contractor support. As these trends continue, the future battlefield

will require ever increasing numbers of often critically important contractor employees.
