

Military Job Superbook Book 1. Worlds Biggest-Best Military Personnel & Industrial Guide

Within the American military, the jobs are as follows: Navy, includes Marines Army Air Force Coast Guard National Guard, Military Reserve ROTC, Regular Office Training Course, free college education, serve as an officer Civilian Jobs on military bases Civilian Contractors Companies that supply Military equipment, food and technology Ex-Military veterans looking for civilian jobs. The biggest part of this is probably the suppliers who supply everything from socks to military aircraft. Within the military equipment companies, there are large research departments creating new ways to defend and kill. Some say they are creating weapons to control the weather as in HAARP and space weapons hooked to satellites. Even NASA, the National Aeronautic Space Administration is about developing technology for military use. These are all jobs in research, science and technology. The internet was created by the U.S. military before they gave it to the people. This book is a central database of websites for all these areas including the worlds biggest straight list of military contractors and companies. Veteran Job Basics Many government defense contractors recruit veterans. Many contractors require their employees to hold security clearances which you probably had while in the military. Security and law enforcement organizations hire lots of ex-military people. All levels of government hire ex-military. Some people are afraid of hiring vets because of all the press about PTSD and loose cannons. If youre smart, pick a trade when you go in that can be easily transferred to civilian life.
