

Mack Model C Fire Truck 1957-1967 Photo Archive (Photo Archives)

In addition to being Macks first entry into the postwar cab-forward fire apparatus market, the C Series boasted an innovative telescoping platform which became the predominant aerial device used by the New York City Fire Department for more than 30 years. Examples of C Series fire apparatus are pictured in service with both large and small fire departments across the country. Each high-quality archival image is accompanied by a detailed caption providing production and service details, as well as equipment specifications and capabilities.
