

The Real Deal: A Guide to Achieving Successful and Real Relationships

This is a book for everyone who wants to find long-term love and success in their lives. You will learn: The basic principles of creating long-term loving relationships. How to use powerful techniques to further your career. How to use communication to recreate failed relationships. How to creatively use practically everything good in our lives depends on our ability to get along creatively and constructively with others. This book will help you to: Get and hold a good job or create a successful business. Find your soul-mate and hold on to the love and closeness. End the fighting and problems with your spouse, your kids and your boss. You are about to begin an adventure, possibly more important to your happiness than any other in your life: A journey toward intimate contact with another human being. This adventure may well be the most heroic, for it will engage you at depths of your being that no other human endeavor can match. The joys you can experience along the way can be exquisite, representing the best that life can offer. The risks and subsequent possibility of failure with their attendant pain are also there. Either way, it is a journey that offers the chance of truly feeling the full range of human emotions and unlocking your full potential for creative happiness. We, each of us, are alone on the planet and there are times and events in our lives when we feel that aloneness and know that of all negative feelings it is by far the worst and most feared.
