

Becoming Somaliland (African Issues)

When does a country become a state? On 18 May 1991, the leaders of the Somali National Movement and the elders of northern Somali clans proclaimed that they were setting up the new Republic of Somaliland. Why has Somaliland not followed Somalia into state collapse? Over the past fifteen years the people of Somaliland have peacefully and successfully managed a process of reconciliation, demobilisation, the restoration of law and order, economic recovery and reconstruction. Why has Somaliland yet to be recognised by the international community? The international system purports to promote good governance in Africa. Somaliland has had one of the most free series of elections in the region. Yet this new republic still has no international legal status, while Somalia, which has had no effective government since 1990, is still accorded de jure sovereignty. Should a unitary government be re-established for all of Somalia? Since the collapse of the Somali state international diplomacy has supported fourteen peace conferences, each focusing on re-establishing Somalia as a whole. Yet it is Somaliland which challenges the typical image of war, disaster and social regression associated with this part of Africa since the 1990s.
