

Boobytraps U.S. Army Instruction Manual Tactics, Techniques, and Skills Plus Long Range Sniper Rifle Caliber .50, M107

A great value! Two military manuals combine into one book. If you purchase both books separate you will pay more for the books plus shipping cost. A boobytrap is an explosive charge cunningly contrived to be fired by an unsuspecting person who disturbs an apparently harmless object or performs a presumably safe act. A. This manual contains procedures, techniques, and expedients for the instruction of the soldier in the assembly, use, detection, and removal of booby traps in combat. B. Included are descriptions and discussions of the design and functioning characteristics of standard demolition items; firing devices, explosives, missiles, hand grenades, mortar ammunition, artillery ammunition, and bombs. C. This manual also contains information on a variety of items and indigenous materials useful for improvising firing devices, explosives, and pyrotechnic mixtures for guerrilla warfare applications. D. Factory-produced boobytraps (dirty trick devices) are described. E. Safety measures pertinent to booby trapping operations are provided for the protection of troops from casualty. This manual contains detailed instruction, diagrams and illustrations to ensure excellent understanding of all aspects of boobytraps and improvised explosive devices. Long Range Sniper Rifle Caliber .50, M107: This manual covers the operation and maintenance of the M107 Sniper Rifle. The manual itself is divided into six chapters, including supporting information. For example, to learn about operating the M107 Sniper Rifle, you would look in the table of contents and discover that Chapter 2 provides all pertinent information about the operation of the M107 Sniper Rifle.. The chapters are: INTRODUCTION; OPERATOR INSTRUCTIONS; Troubleshooting Procedures; MAINTENANCE INSTRUCTIONS; AMMUNITION MAINTENANCE

INSTRUCTIONS; SUPPORTING
INFORMATION. Full of great detail, easy
to follow with pictures.
