

BPA and the struggle for power at cost

A history of the Bonneville Power Administration by journalist and former BPA official Gene Tollefson. Beginning with how electrical power stations first came to the Pacific Northwest in the late 1800s, Tollefson details the genesis of what later became the BPA, and how the new organization led the way to bring electrical power throughout the region. Full of insight and some amazing photographic journalism, this is a clear and articulate history of one of the Pacific Northwest Regions most important organizations.
