

## Why Dont You Kill Yourself: Its Math Not Magic

This book has nothing to do with killing yourself; its about the reasons why you wouldnt. Why Dont You Kill Yourself is the title because most of us would never consider killing ourselves. The thought may have crossed our mind at some extremely difficult point in our life, but we didnt. We didnt do it then, and we wouldnt do it now. One of the reasons is because we have some things we would like to accomplish or create in this life. This book is titled Why Dont You Kill Yourself because even though every one of us has a reason, conscious or subconscious, we wouldnt consider killing ourselves; very few of us actually act on these dreams, turn these dreams into goals and go for it. This book is about getting on with it and being about the business of making these dreams happen. Life is about, or should be about, following your dreams. Its about working through the snags, tearing down the walls, and swimming through the mud that is in the way of your dreams. Its about feeling the unbelievable, ineffable feeling of pushing through everything to get to who you always wanted to be, doing what you always wanted to do, having what you always wanted to have, and feeling what you always wanted to feel. Its about looking back and being proud of what you overcame to get to where and who you are. Its about slowly, or quickly, forming the discipline and the habits to overcome, or go around, anything that gets in the way of your dreams. Life is about having a purpose and a reason for being here; its about the reasons that you would never consider killing yourself.
