

Success Through Behavioral Change: Change Your Behavior, Environment, and Life for the Better, with This Self-Help Model

Why do individuals behave and react in certain ways? In *Success through Behavioral Change*, author Ralph E. Saucier Sr. uses himself as an example to indicate how a change in an individuals personal environment affects that persons total outlook on life, personality, and ability to communicate with different groups of people. This same environmental modification can positively affect people who want to have success in life. Written to help you understand that your behavior is the reason for where you are in life, *Success through Behavioral Change* explains how past, present, and future environmental influences shape the course of your life. You dont have to merely accept your current position; you can move ahead and change your life by altering your behavioral patterns, and possibly your environment so that you can accept a situation that will enhance your vision of where you want to be. Ralph not only directs you to other valuable resources to further develop your behavior, but also provides a guide-with a working model-that will show you how to achieve success.
