

Color Atlas of Forensic Medicine and Pathology, Second Edition

Now in its second edition, the best-selling Color Atlas of Forensic Medicine and Pathology is an easy-to-read reference covering forensic pathology principles, from basic to advanced concepts relating to all manners of death. Featuring over 1600 full-color images, including 400 more photographs than the first edition, this book provides unparalleled photographic illustration to enhance understanding for medical and non-medically trained personnel. Providing thorough visual demonstrations of postmortem changes of the human body, the book presents the different kinds of patterns produced in deaths resulting from Natural causes Diagnostic procedures Therapeutic procedures Substance abuse Poisoning Child abuse Firearms Blunt instruments Sharp instruments Burns Asphyxia The book also includes an entirely new section on histopathology. The text uses specific, detailed language to describe what is represented in each photo and to make side-by-side comparisons of similar but distinct pathologies. The Color Atlas of Forensic Medicine and Pathology, Second Edition is an invaluable professional reference for death investigators, medical examiners, and forensic pathologists.
