

Through the Crosshairs of a Scope

From 1964 through 1966, a special bond was formed between the soldiers of the special ops team. Although many didn't expect them to survive, the men defied the odds and all returned safely to continue their strong bond of friendship. From Texas to Florida and on to the outer reaches of Iceland, meet a team of men who fought for the United States with no recognition and peer through a scope at their friendship, which has stood the test of time. Author Bio: Debut author Bill Anthony resides in Phoenix, Arizona and still keeps in touch with his special ops team, which was the inspiration for this fictionalized account.
