

# What You say, Will Make Your Day: A Self-help Guide to Personality & Communication

This book is a story a story of how a young lad from a small village came to Delhi and got knocked around because he was not as smart as the others and did not know English. The book is about his struggles and how he overcame his shortcomings. It is about how he went about the business of communication. The Problem: The basic problem that most people face while communicating is a lack of words. I cannot find words to say what I want to say is the most common difficulty. Most people know what to say but they either do not have words, or do not know how to say it. This makes them hesitate and pack-up when they are in front of an audience. The Solution: The solution is what this book is all about. In a lucid way each problem is dealt with and by the time you come to the end of the story a lot of your communication problems would come to an end. It is not important to tell someone what is wrong with what you are doing, because that is just identifying the problem, it is more important to tell her how to solve that problem that is the solution. This book is the solution to your communication and personality problems. The purpose of this book is to make you a more confident communicator. How this book came About: I have taught business communication to thousands of students. I have also been involved in training company executives, senior government officials and have dealt with communication deficiencies of my trainees and have always tried to help each one realize her potential. In doing so I have met many characters who have now become part of this book. A lot of what is happening happened with me. This book gives you some stuff that has actually worked for people in real life. It has come about due to practical interaction and documentation over three decades. Writing it took me five years. This book is a journey of a young lad from college to

maturity. It will remind you of your journey if you are already out of college. If you are about to go to college, or are in college, then it will help you go through college with great confidence in communicating with people. There are thought provoking questions at the end of some chapters. Try to answer these questions in your mind. There are answers given in the appendix at the end of the book.
