Included are descriptions and discussions of the design and functioning characteristics of standard demolition items; firing devices, explosives, missiles, hand grenades, mortar ammunition, artillery ammunition, and bombs. C. This manual also contains information on a variety of items and indigenous materials useful for improvising firing devices, explosives, and pyrotechnic mixtures for guerrilla warfare applications. D. Factory-produced boobytraps (dirty trick devices) are described. E. Safety measures pertinent to booby trapping operations are provided for the protection of troops from casualty. This manual contains detailed instruction, diagrams and illustrations to ensure excellent understanding of all aspects of boobytraps and improvised explosive devices. Combat and Operational Stress Control: This manual provides doctrinal guidance for controlling excessive stress in combat and other operational environments. It identifies command and leadership responsibilities for COSC. It identifies COSC consultation, training, and education assistance available for units. This manual provides definitive guidance to BH personnel and CSC units for their COSC mission and for management of COSR and other behavioral disordered patients (BDPs). It identifies the requirements for COSC consultation, planning, coordination, rehearsal, and implementation of the COSC plan contained in the FHP annex of the operation order (OPORD). Many stressors in a combat situation are due to deliberate enemy actions aimed at killing, wounding,
