

What am I? Where do I come from? Where am I going? What is my purpose? Man has been searching for answers to these mysteries since the dawn of time. History proves that to solve a mystery, one should ignore everything one has been taught, and approach the subject as if for the first time-with a completely open mind, with no pre-conceived ideas about how things should be. Because once one has been indoctrinated into a specific school of thought, one already knows how things work-so, by definition, all conflicting information is false, and is therefore either rejected, or distorted to make it fit ones model of reality. The only thing that interferes with my learning is my education (Albert Einstein). A new scientific truth does not triumph by convincing its opponents . . . , but because its opponents eventually die. (Max Planck). Practical philosopher and free-thinker, John Richard, investigates these mysteries with an unbiased mind, untrammelled by the myriad, flawed answers and philosophies humanity has had to swallow for thousands of years. Not satisfied with just the answers to these questions, he also asks questions very few think to ask, and in so doing, discovers the hidden processes which create our reality and how to control these. The result of this unique approach is a compelling revelation of what can only be described as a deliberate, divine deception-and exposes the many hoaxes and false philosophies perpetrated on humanity since the dawn of time, most of which continue to this very day. Are you searching for answers, trying to discover your lifes purpose, or just simply looking for a place to kick-start your thinking? If you are ready-open your mind and more importantly, your heart-because this is where your higher self resonates with the truth.
