

National Parks of New York Harbor Traveler Information System: Concept of Operations

This document serves as the Concept of Operations for the New York Harbor (NPNH) Traveler Information System (TIS). It describes the TIS as a system with two primary purposes: (1) to inform visitors about the site characteristics such as historical significance, activities and events, location, and thematic relationship to each other and (2) to provide information how to navigate to and between sites using public transportation and by walking.
