

Activate Your Mind to Succeed: My Autobiography Journey

This book is part of the Activate Your Mind to Succeed series. (Phase 3: Getting Closure) Most of the time after we receive the mental, physical and spiritual stability to start moving forward in a newness of life, we tend to still keep a subconscious profile of the damages that caused our derailment that still leaves hurtful pressure within our average thinking process that can induce unnecessary headaches and other things of that nature. The most therapeutic way to relieve those tensions and not continually relive it from time to time is to begin freeing your mind, opening your heart, and writing down your own personal autobiography; a testimonial journey of where you've been and the struggles that you have endured. Give yourself some closure. This journal is already set for you to start your first chapter.
