

How Trump Could Fix the USA: Policy Excerpts from The Donne Deal: How One Man Bought and Fixed the USA (retitled The Devlin Deception, first published in September 2012)

If Donald Trump would embrace and champion these policies, he could beat Hillary in a landslide and fix the USA within a few years. (Hillary couldn't - or wouldn't.) For policy wonks and political science students, this is an excerpt of some of the policies put in place by Gordon Donne in *The Donne Deal*, after he bought (legally) the United States government and fired Congress, the President and the Supreme Court, and took over all legislative, executive and judicial responsibilities. *The Donne Deal* (retitled *The Devlin Deception*) is a work of fiction, with elements of action, espionage, sex and humor, but many of Donne's serious policies are distilled into this mini-book, with none of that fluff, as some might call it, included. A dictator with total authority, like Donne, should also have the wisdom to exercise that authority sparingly. Agree or disagree? Do his policies follow that dictum? And what other questions or discussion topics might this mini-book raise in the readers' minds? (There are several blank pages at the end of the print version of this book for those who might like to jot down some notes.)
