

The Maya Codex

DECEMBER 2012 TIME IS RUNNING OUT . . . Deep in the Guatemalan jungle lies the Maya Codex, an ancient document containing a terrible warning for civilisation. Archaeologist Dr Aleta Weizman and CIA agent Curtis OConnor are desperately searching for the codex, but powerful forces in Washington and Rome will do anything to stop them. Both Weizman and OConnor know that the earth will align with a massive black hole at the centre of the galaxy on the winter solstice, December 2012 just as the Mayans predicted. Might a catastrophic pole shift be on the way? From the corridors of power in Nazi Germany to modern-day Washington, from the secret archives of the Vatican to the Temple of the Lost World pyramid in the jungles of Central America, The Maya Codex takes us on a heart-stopping journey to find the codex before its too late. Adrian dHage mixes doomsday superstition with Da Vinci Code-like investigation in this page-turner thriller. Courier Mail
