

## No God, No Science: Theology, Cosmology, Biology (Illuminations: Theory & Religion)

No God, No Science: Theology, Cosmology, Biology presents a work of philosophical theology that retrieves the Christian doctrine of creation from the distortions imposed upon it by positivist science and the Darwinian tradition of evolutionary biology. Argues that the doctrine of creation is integral to the intelligibility of the world Brings the metaphysics of the Christian doctrine of creation to bear on the nature of science Offers a provocative analysis of the theoretical and historical relationship between theology, metaphysics, and science Presents an original critique and interpretation of the philosophical meaning of Darwinian biology
