

## Orthodox Apologetic Theology

Christian Apologetics is quickly becoming a lost art. Especially lacking is the Christians ability to present a cohesive integrated world-view, which inspires and moves the hearts of men. The many inroads against Christianity in our modern society are most often due to the inability of Christians to defend their faith through articulating the biblical and patristic Christian cosmology. **ORTHODOX APOLOGETIC THEOLOGY** is a timely treasure. Through it, I. M. Andreyev clearly explains the function of Apologetics for the Christian faith. Then he sets forth the basic elements of patristic Christian cosmology. It is evident that Christ has transformed his own heart and that he speaks from his love for Truth. **ORTHODOX APOLOGETIC THEOLOGY** enables one to bypass the desert of modern theological academia and drink deeply of that ancient Orthodox cosmology which has converted nations and inspired apostles, martyrs and saints.
