

Deadfalls And Snares (Elemental Historic Preparedness Collection) Annotated (Prepper Archaeology Project Book 1)

The old ways of trapping and snaring are forgotten by most today and the times to remember them are once again upon us in these times of economic and disaster uncertainty. This old style survival book of trapping and snaring lore, contains one of the greatest descriptive and applicable primitive and modern ways of acquiring game for food and sustenance. The book that was originally published in 1907 has been digitalized painstakingly, not a cheap scan like some offer that is blurry and hard to read. This volume contains information on building deadfalls, snaring with the bits of string you can find or using commercial grade wire snares, portable traps, bear and raccoon deadfalls to name a few. Specific animals are covered and their habits which include, Otter deadfall, Marten Deadfall, Stone Deadfall, The Bear Pen, Portable Traps, various trap and Snare Triggers, Trip Triggers, How to Set, When to Build, Where to Build, The Proper Bait, what to do about traps knocked down, Spring Pole Snare, Trail Set Snare, Bait Set Snares, The Box Trap, The Coop Trap, The Pit Trap, Number of Traps, When to Trap, Seasons Catch, General Information, Skinning and Stretching, Handling and Grading, and From Animal to Market. This is a classic collection from Harding who was one of the first national advocates of scientific wildlife management, conservation and good sportsmanship in the 1900's. This early work is a fascinating look at a vanished era and skills we can still use today
