

## Beyond Spring

This anthology of poetry from the Sung Dynasty, translated into English, represents the golden age of the Tzu period in the 10th-12th centuries AD. These translations of an important lyric form in Chinese literature strive to capture the phrasing and rhythms crucial to Tzu. Organized by individual poets, the collection includes an introduction to symbols and allusions which enables the reader to discover references in specific poems. The text also contains biographies of the Chinese poets, a glossary of terms, and an historical chart of Chinese poetic genres.
