

NBC Decontamination and Tactical Employment of Nonlethal Weapons

A great value! Two military manuals combine into one book. If you purchase both books separate you will pay more for the books plus shipping cost. NBC Decontamination: The extent and timing of decon depends on the tactical situation, the mission, the area of contamination, and the decon resources available. Survivability and reducing the effects of any chemical threat are the ultimate goals of decon. This manual provides detailed guidance on conducting decon operations performed by chemical and nonchemical personnel. Individual soldiers and leaders must be familiar with the basic procedures and concepts in this manual. Tactical Employment of Nonlethal Weapons: This publication describes multi-Service tactics, techniques, and procedures (MTTP) for consideration and use during the tactical employment of nonlethal weapons (NLW) in support of warfighting personnel conducting training and tactical operations. This publication-

- Provides an overview of NLW and its relationship to deadly force.
- Provides NLW system description.
- Describes the capability requirements of NLW.
- Discusses fundamental concepts and training requirements involved with NLW.
- Discusses the tactical employment considerations of NLW.
- Discusses lessons learned from previous NLW use.

This publication provides a single-source, consolidated reference on the tactical employment of NLW and supporting systems.
