

The Northern Danelaw: Its Social Structure, c.800-1100 (Studies in the Early History of Britain)

Investigating the changing nature of lordship and peasant statuses, the transformation of estate structures, the emergence of villages, and the development of the parish system, D. M. Hadley also explains the peculiarities of the northern Danelaw and reassesses the impact of the Scandinavian settlements on its society and culture. A detailed local study is combined with a consideration of wider issues concerning Anglo-Saxon England and London, and short-term changes unrelated to successive conquests.
