

Thinking 101: Fundamentals of a Successful Mindset (Successful Mindsets) (Volume 1)

We began learning through experience, by finger-painting and imagination. We then transitioned to conformity, coloring within the lines, and believing in results- that what is evidenced is what can be accomplished. Thinking is a basic function of life. The way we think, including rationale behind our thinking is what separates us from animals, yet there are primal instincts that influence the thinking of both and influence our potential. Proverbs states that So a man thinks, so is he. Ghandi said, A man is but a product of his thoughts, what he thinks he becomes. If thinking is so important to our existence and success, why is how to think (not what to think) not included in the core curriculum throughout our schooling, from early on? Here lies the basis for Thinking 101: Fundamentals of a Successful Mindset. Get ready to get out of auto-pilot and into the drivers seat of your successful life. Introducing a new philosophy on success psychology that will revolutionize how you approach life. Who says you cant achieve your dreams? What happened to dreaming being okay? Where and when did the shift away from imagination occur? What is reality? Our mindset holds the key. Thinking 101: Fundamentals of a Successful Mindset helps us to learn what we should have learned...how to think....not what to think. Thinking 101 will enable you to tap into the successful mindset you already have. Come back to the basics of dreaming like you did when you were a kid. Come back to your Successful Mindset
