

Tales from the Field: Lurchers and Terriers

This book is a collection of tales from the authors life spent hunting with dogs. Most of the dogs featured were, and are the authors. This book has been written as a tribute to their skills and to their expo its, and as a record of their lives and a salute to their collective canine souls. Many working dogs die young, much younger than those pets which seldom leave the safety of the local park or garden. Hunting is dangerous, especially so for the fat dog, be they pure-bred sight hound or lurcher. Few are those which make it to old age unscathed. I believe that they wouldnt have it any other way.
