

Saw Her Standing There

In New York City, there were these two people, Ryan and Lane. They met in high school, fell in love, and later married. Yes, to each other. From here, it would be easy to ask, Does anyone die? Did they turn into wizards? Witches? Ghosts? Vampires? How about zombies? Or, are they monsters of unknown origins, their only aim to annihilate their neighboring monsters by gnashing them to delicious morsels with their ridiculously sharp incisors, leaving the planet to stew in the juices and horrific odors of rotten animal flesh, splintered bones, and exposed innards, then kill each other because: (1) they get hungry again and (2) they dont like vegetables? No. None of that stuff will be found in this novel. Through these pages, you will learn about Ryan and Lane, who are regular humans devoid of any superpowers, as well as their fellow Filipino-American friends, and how they maneuver through personal challenges while attending their Queens high school. Follow them as they play sports, kiss (and more), use the foulest language, excel academically (at least most of them), fight, go to parties, eat food, take public transportation, and, most importantly, learn about each other. And, if youre asking, Hey, from the title and the photo on the cover, I thought the Her was either dead or a ghost. But, it turns out shes neither? What the f? Theres a reason why. It can be found inside the book.
