

Blisters of Chimurenga

Blisters of Chimurenga is a riveting story of love, violence and power. Jerry, a new university graduate, considers himself lucky to have found a secure job and the love of his life amid Zimbabwe's volatile environment. Jerry and Vera begin their lives with honey on their tongues and moon in their eyes; instead, they are embroiled in serious political battles for survival. Vivid in portraying the impact of the current Zimbabwean crisis on ordinary citizens, and lucid in projecting the realities and struggles of people's daily lives, Marshall Shumba sees his characters, of all colours, as part of the land they inhabit. The people suffer, the land suffers with them.
