

What Happened to Our Church?

Our culture continues to go through rapid changes in technology which effect the way we learn, the way we interact with each other, and the way we build relationships. At the same time the culture is going through ethnic, religious, and socio-economic changes. Each generation deals with these changes in different ways. All of this has had a big influence on the church in America. Some churches are thriving but most are struggling to find their place in this new world. This book explores many of these changes and offers practical, proven ways churches may respond. It is written in everyday language for church people and pastors. The author is an experienced church consultant, who writes from the perspective of 35 years working in and with churches of all types from new church plants to those over a century old. This book is for anyone who is wondering, What happened to our church? and Where do we go from here?
