

How to conduct and understand research; for every purpose you can think of.: Self-Help guide to understanding and conducting research

The truth about discovery is that everyone can discover the truth. Everyone has the curiosity and the potential to become an expert on any topic that they choose to research. Research is the key to unlocking vast amounts of information, answering a great number of questions, solving a great number of problems, and even presenting new questions never before asked. Research is the tool for novices (amateurs) and experts alike to discover information, solve problems, and ask and answer questions that they themselves or the scientific community is asking or talking about. In this book you will learn the steps you will need to conduct your very own research project to unlock the answers to questions and reveal new information on the topic or topics you choose. This book is for anyone who has a desire to learn more about any and everything. You may want to buy a new or used car and want to shop the best price and safety features; well, in order to do that you need to know some foundational steps on how to conduct good research. Say you want to buy some antiques from the post-modern era you will need to know how to conduct research in order to find out about the artists, times, and works from that period. This book is a one stop guide for the beginner researcher who is looking to do good solid research to write papers on their research for class or fun.
