

## Volkswagen: Model Documentation: Beetle to 412, Including Transporter (Boxer Engine Models)

The idea of building a car for the people was not new, but the success of such models had always been limited. At least until 1946, when the Volkswagen factory began building the first Beetles for public consumption. From then on the car just ran and ran. Volkswagen Model Documentation begins by telling the history of Volkswagen after the war, how the British under Major Ivan Hirst rescued Porsches concept from the rubble, and how Heinrich Nordhoff then steered the company to worldwide success. Joachim Kuch then examines in detail the genesis and history of each Volkswagen model, beginning with the Beetle and Cabriolet (Types 1 and 151), through the Karmann-Ghia (Type 14), Thing (Type 181) Transporter (Type 2, including air-and watercooled, Campmobile and Westfalia), Type 3 (Notchback, Squareback, Fastback, Ghia), Type 4 (411, 412), and 914 (4-and 6-cylinder). Also included are separate sections detailing the important dates, changes, and milestones in each models production run. Packed with photographs, quotes from press and test articles of the time, and information from internal Volkswagen documents, Volkswagen Model Documentation tells the comprehensive story of all the Volkswagen boxer-engine models.
