

Joint Publication JP 3-40 Combating Weapons of Mass Destruction 10 June 2009

This publication provides fundamental principles and guidance for combating weapons of mass destruction (CWMD) and their means of delivery. This publication has been prepared under the direction of the Chairman of the Joint Chiefs of Staff. It sets forth CWMD doctrine to govern the activities and performance of the Armed Forces of the United States in joint operations and provides the doctrinal basis for interagency coordination and for US military involvement in multinational operations. It provides military guidance for the exercise of authority by combatant commanders and other joint force commanders (JFCs) and prescribes joint doctrine for operations. It provides military guidance for use by the Armed Forces in preparing their appropriate plans. It is not the intent of this publication to restrict the authority of the JFC from task organizing the force and executing the mission in a manner the JFC deems most appropriate to ensure unity of effort in the accomplishment of the overall objective. Joint doctrine established in this publication applies to the Joint Staff, commanders of combatant commands, subunified commands, joint task forces, subordinate components of these commands, and the Services. The guidance in this publication is authoritative; as such, this doctrine will be followed except when, in the judgment of the commander, exceptional circumstances dictate otherwise. If conflicts arise between the contents of this publication and the contents of Service publications, this publication will take precedence unless the Chairman of the Joint Chiefs of Staff, normally in coordination with the other members of the Joint Chiefs of Staff, has provided more current and specific guidance. Commanders of forces operating as part of a multinational (alliance or coalition) military command should follow multinational doctrine and procedures

ratified by the United States. For doctrine and procedures not ratified by the United States, commanders should evaluate and follow the multinational commands doctrine and procedures, where applicable and consistent with US law, regulations, and doctrine.
